Attorney Tim Bussey is a long time prominent Colorado Springs litigation attorney. Mr. Bussey specializes in criminal defense, DUI defense, and serious auto accident cases. He has over 23 years of experience litigating cases throughout Colorado including courts-martial and federal cases. He is a former active duty Air Force Judge Advocate and former Deputy District Attorney in El Paso and Teller Counties.

Mr. Bussey continuously explores new strategic ground and is requested by other lawyers when they need to learn innovative trial tactics and techniques. He has recently gained notoriety for exposing problems involving blood alcohol testing at the Colorado Department of Public Health and Environment Crime Laboratory. This crime laboratory ceased blood alcohol testing in 2013. Prior to the Colorado Department of Public Health and Environment Laboratory, Mr. Bussey exposed the Colorado Springs Metro Forensic Laboratory in Colorado Springs. His uncovering of laboratory errors was a key component to a decision by the United States Supreme Court in *Bullcoming v. New Mexico*, 131 S. Ct. 2705 (2011). In supporting its decision, Supreme Court Justice Ginsburg cited a newspaper article where Mr. Bussey was quoted which highlighted the problems at the laboratory in Colorado Springs.

Tim Bussey has been selected by the National Trial Lawyers Association as a Top 100 Trial Attorney since 2007. He is the nationally published co-author of "Defending DUI Vehicular Homicide DUI cases," "Utilizing Forensic Science in Criminal Cases," "Defense Strategies for Drug Crimes," and "Trends in DUI Discovery." His knowledge and skill has earned Mr. Bussey an AV rating, the highest peer review rating under Martindale Hubbell's peer Review Rating process, a rating that show a lawyer has reached the height of professional excellence. Mr. Bussey has been repeatedly listed on Colorado Super Lawyers and was again selected in 2015.

Mr. Bussey is also a requested speaker at state, national and international Continuing Legal Education seminars and meetings. He is a nationally published co-author of six books and spoke at the American Chemistry Society National Meeting in 2011."
